

ASSET MANAGEMENT SOLUTIONS

ASSET COMPLIANCE

MADE SIMPLE THROUGH

ASSET MATE

About Asset Mate

Developed by Tyne Valves Limited, Asset Mate brings together decades of process industry experience with next generation digital asset management.

With a deep understanding of process safety, traceability and maintenance challenges, we recognised a growing need across engineering sites not just for reliable components, but for smarter asset visibility and compliance control. That insight led to the creation of Asset Mate, our dedicated asset management brand.

Asset Mate combines Tyne Valves' proven technical expertise with digital innovation, providing a structured, compliant, and data-driven way to manage critical plant assets. Whether you're overseeing shutdown planning, audit preparation, or day-to-day maintenance, Asset Mate keeps your operation organised, compliant, and ready for inspection at any time.

From chemical and petrochemical to pharmaceutical and food and beverage sites, our mission is simple: to make compliance effortless, maintenance predictable and asset data accessible.

Compliance Confidence

Ensure every asset is fully certified, inspected and documented to meet site and industry standards

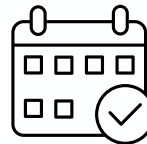

Total Traceability

Centralise key asset data such as specification, certification and test records etc.

Digital Record Keeping

Move beyond spreadsheets with secure cloud-based storage with instant access to all your key asset data

Maintenance Scheduling

Keep track of shutdowns, inspection deadlines and asset condition automatically

Operating 2 Locations

Tyne Valves and Tees Valves, we are committed to effectively serving the North-East region and beyond.

Backed By Our Partnership Network

Access our complete network of trusted suppliers, inspection and testing services and process engineering expertise

Digitising The Process Industry

Asset Compliance Made Simple Through Asset Mate

How It Works

In just a few steps, you can take control of your entire asset base from registration, scheduling maintenance and inspections to reporting.

1 Register & Inspect Your Assets

Onboard your selected assets and assign them a unique digital profile from general information such as asset type and location, to more in-depth asset specifications such as serial numbers, pressure/temperature ratings etc. whilst undertaking a preliminary inspection.

2 Upload Supporting Documentation

Centralise all associated documentation such as Certification, Approvals and Compliance records.

3 Schedule Maintenance and Inspections

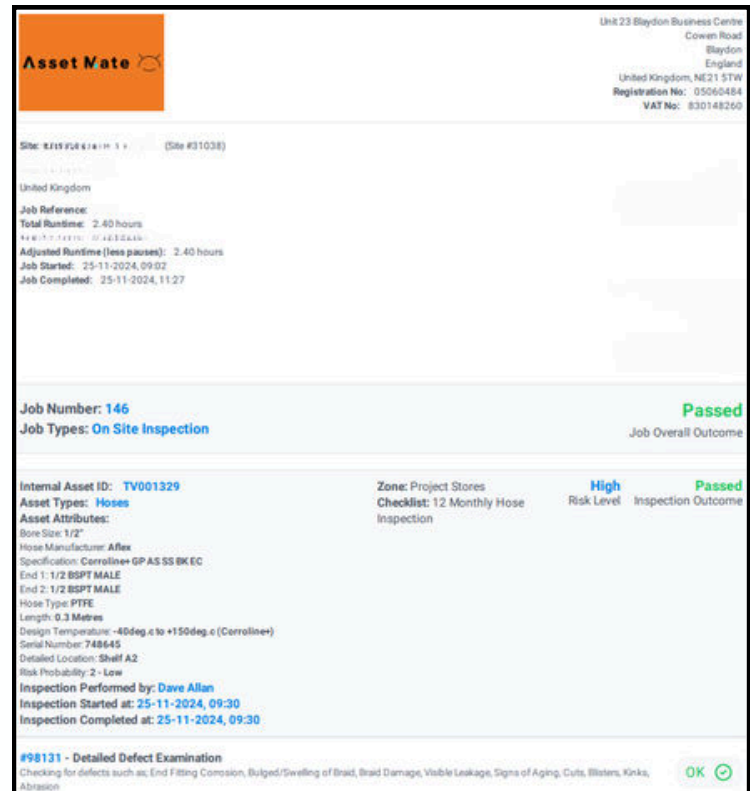

Set up automated reminders for routine inspection and certificate renewals.

4 Track, Update and Analyse

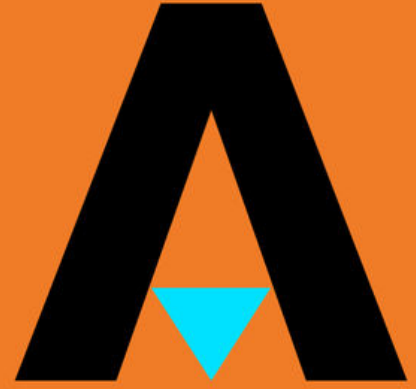

Gain full traceability with real-time asset history, inspection results and maintenance notes.

5 Stay Audit Ready

When it's time for inspection, all asset records from certificates to maintenance logs are accessible within seconds. Asset Mate ensures every document, test record and inspection is linked, timestamped and compliant with industry standards.

Asset Compliance Made Simple Through Asset Mate

Asset Types Covered

Asset Mate is designed to handle a wide range of equipment critical to process safety, production reliability, and site compliance.

Our Core Asset Categories are:

Flexible Hoses and Bellows

PTFE Lined, Metal and Hydraulic Hoses, PTFE, Rubber and Metal Bellows

Process Valves

Manual and Automated Valve Packages

Safety Devices

Pressure Relief Valves, Bursting Discs and other emergency systems

Vessels and Tanks

Pressure Vessels, Mixing & Reactor Vessels, Storage Tanks and Heat Exchangers and Air Handling Units, Hydraulic Cylinders

Instrumentation

Gauges, Transmitters and Monitoring Devices

Asset Compliance Made Simple Through Asset Mate

Partnership Network

With the support of Tyne Valves and Tees Valves, our customers benefit from improved service levels across multiple process sectors. Our strategically situated facilities in Tyneside and Teesside allow us to effectively cater to a diverse customer base throughout the North East and beyond.

Asset Mate can tap into the extensive inventory of Tyne and Tees Valves, utilising their comprehensive supply chain to meet urgent needs during breakdowns.

We offer consultancy services either on-site or remotely, thanks to our highly skilled qualified staff who focus on your assets and help optimise their life cycles. For all flexible hose consultancy and inspection, we have a number of BFPA qualified staff available.

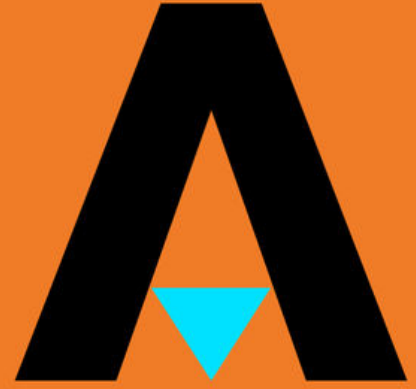

Additionally, Asset Mate collaborates closely with Aflex Hose, a world renowned manufacturer of the most advanced range of PTFE-lined flexible products. Our partnership with Aflex guarantees our customers receive complete product reliability and compliance for all their applications.
