

A COMPANY ENGINEERED TO SUCCEED

Our aim is to offer a diverse inventory including valves, actuators, control equipment, and flexible hoses, supporting projects over £1 million and day-to-day maintenance. We have an extensive product range meets the needs of each sector in the process industry from API Pharmaceuticals, Chemical and Petro-Chemical to Oil & Gas, Food & Beverage and Water Treatment

Emphasising customer engagement with friendly and technical support, we operate on a 'one stop shop principle' with a clear focus on customer satisfaction. We provide fast delivery on various valve, automation and other pipeline products, we strive to continuously evolve our product portfolio to align with market demands and opportunities.

Flowserve offer market-leading products across each of their in-house brands from 3-piece and flanged ball valves (non-lined and lined), to control valves, severe service application valves and actuation and controls. As a leading UK stockist, we offer Worcester, Atomac, Durco, Norbro and PMV brands with further access to their other brands such as Kammer, Valtek and MaxFlo.

Flowserve products are available from stock.

Emerson have a comprehensive product range from valve control and monitoring to air preparation and handling units suitable for all applications and environments. Our vast Emerson stock consists of Topworx switchboxes and a variety of ASCO products from solenoids to filter regulators.

Emerson products are available from stock.

Pneumatrol provide engineered pneumatic solutions for use within hazardous and non-hazardous environments. Our stock comprises of a variety of solenoid designs from Namur, Remote and Banjo mounted suitable for all applications.

Pneumatrol products are available from stock.

Aflex Hose produces advanced PTFE-lined flexible hoses designed for demanding applications that require chemical resistance, high purity, and long-term reliability, serving sectors such as pharmaceuticals and chemicals in the process industry.

Aflex Hose products are available from stock.

TLV are a specialist manufacturer for steam and condensate products. Their range covers valves, pumps, traps and other fluid measurement and control equipment. In addition they provide consulting, engineering and design services for steam and power systems.

TLV products are available from stock.

Samson develop and manufacture high quality control valves covering a number of areas in the process industry. Well known for their quality, they provide globe, rotary plug, ball and butterfly control valves. Their innovative designs and robust construction ensure optimal performance and longevity, making them a preferred choice

Valtorx are the industry leader for portable valve actuators and trapped key interlocks. Their innovative portable valve actuators are offered in electric, pneumatic and petrol motored models and are designed for manual valves that are too stiff to turn or required a high number of turns to open/close.

Bonney Forge are highly regarded as setting the standard in the process industry for forged and cast products, in particular gate, globe and check valves. Their manufacturing capabilities allow them to cover both standard and bespoke designs.

Orbinox are a trusted manufacturer with decades of experience in designing and manufacturing knife gate valves, penstocks and dampers. We have a long relationship with Orbinox for our work in the paper and pulp industries.

Max-Air offer a comprehensive range of products including actuators, switchboxes and solenoids, which have consistently proven to be reliable solutions for us and many of our customers across various sectors of the process industry.

Max-Air products are available from stock.

Noah are specialists in the manufacturing of electric actuation. They supply reliable and dependable products to the market, covering a wide range of specifications from on/off type, multi-turn type and fail-safe type actuators with various voltage supplies.

Noah products are available from stock.

Brandoni are a selected choice for many process industries due to their reputation for providing reliable performance in the field. They have a vast product offering of ball, butterfly and check valves.

Asset Mate is our in-house asset management brand founded in 2024. Asset Mate helps engineering teams keep track of equipment with simple digital tools for logging, monitoring, and managing assets throughout their life cycle.
