

Engineered To Succeed

A Company Engineered To Succeed

We supply valves, actuators, control equipment and flexible hoses for projects over £1 million through to day-to-day maintenance across industries including Pharmaceuticals, Chemical & Petrochemical, Oil & Gas, Food & Beverage and Water Treatment.

With a 'one-stop-shop' approach, we combine technical support, fast delivery and a continually evolving product range to meet customer and market requirements.

Flowserve offers market-leading ball, control and severe service valves, alongside actuation and controls across brands including Worcester, Atomac, Durco, Norbro and PMV, with access to Kammer, Valtek and MaxFlo.

Flowserve products are available from stock.

Emerson offers valve control, monitoring, air preparation and handling products, including Topworx switchboxes and ASCO solenoids and filter regulators.

Emerson products are available from stock.

Pneumatrol provides engineered pneumatic solutions for hazardous and non-hazardous environments, including NAMUR, remote and Banjo-mounted solenoids.

Pneumatrol products are available from stock.

Aflex Hose produces advanced PTFE-lined flexible hoses, offering chemical resistance, high purity and long-term reliability across industries including pharmaceuticals and chemicals.

Aflex Hose products are available from stock.

TLV specialises in steam and condensate products, including valves, pumps, traps and fluid measurement and control equipment.

TLV products are available from stock.

Orbinox is a trusted manufacturer of knife gate valves, penstocks and dampers, with decades of experience and a strong track record in the paper and pulp industries.

Samson manufactures high-quality control valves for the process industry, including globe, rotary plug, ball and butterfly valves. Their innovative designs and robust construction deliver reliable performance and long service life.

Max-Air supplies reliable actuators, switchboxes and solenoids for a wide range of process industry applications. Max-Air products are available from stock.

Max-Air products are available from stock.

Valtorx is a leading provider of portable valve actuators and trapped key interlocks, offering electric, pneumatic and petrol models for manual valves requiring high torque or multiple turns to operate.

Noah specialises in reliable electric actuators, including on/off, multi-turn and fail-safe models with various voltage options

Noah products are available from stock.

Bonney Forge is highly regarded for forged and cast gate, globe and check valves, offering both standard and bespoke designs for the process industry.

Brandoni is trusted across the process industries for reliable ball, butterfly and check valves.

Brandoni products are available from stock.

Asset Mate is our in-house asset management brand founded in 2024. Asset Mate helps engineering teams keep track of equipment with simple digital tools for logging, monitoring, and managing assets throughout their life cycle.
